New Delhi, the 23rd May, 2018

DIRECTION

Subject: Direction under section 13, read with section 11 of the Telecom Regulatory Authority of India Act, 1997 to all Access Service Providers regarding online filing of tariff offers.

F. No. 303-2(1)/2017-F&EA (Vol. II) - Whereas the Telecom Regulatory Authority of India, [hereinafter referred to as the Authority], established under sub-section (1) of section 3 of the Telecom Regulatory Authority of India Act, 1997 (24 of 1997) has been entrusted with discharge of functions, inter alia, to regulate telecommunication services; ensure compliance of the terms and condition of licence; notify rates for telecommunication services; protect interest of the consumers of telecommunication service;

2.   And whereas clause 7, read with sub-clause (l) of clause 2, of the Telecom Tariff Order, 1999, provides that all service providers shall report to the Authority any new tariff for telecommunication services and/or any changes therein within seven working days from the date of implementation of the said tariff for information and record of the Authority after conducting a self-check to ensure that the tariff plans are consistent with the regulatory principles in all respects;

3.   And whereas, in order to protect the interest of the consumers of the telecom services, the Authority has launched the Beta version of Online Tariff Filing Portal enabling the consumers to view tariff of all service providers and compare them;

4.   Now, therefore, in exercise of powers conferred upon it under section 13, read with section 11, of the Telecom Regulatory Authority of India Act, 1997 and to protect the interest of the consumers of telecom sector, the Authority hereby directs all the Access Service Providers to report to the Authority with effect from the 30th June 2018, through XML API web-service, all the tariffs offered to the consumers, in addition to the existing Tariff Reporting requirements.

(Kaushal Kishore)
Advisor (F&EA)

All Telecom Access Service Providers

TRAI &Telecom Access Service Providers (TSPs) API SPECIFICATIONS

Version: 6.2

Table of Contents

XML API For Receiving Tariff Data From TSPs

Purpose

The purpose of this XML API is to enable TSPs to push their respective tariff data to TRAI server in XML format. The data will be authenticated before it is stored in the TRAI database. The framework will also implement a communication methodology that will give TSPs information on the status of data submission. TSPs will be provided with a URI to which they will push the data in the form of an XML file along due authentication parameters.

Processing Methodology

Step 1 : XML File Generation

TSPs will generate an XML file as per the predefined format (details as per annexure-1 later in the document). This should be a valid XML file whose structure should be strictly as per the predefined format, with no missing or misspelled tags. The sequence of tags should also be exactly as per the sequence in the predefined format.

Step 2 : Web Request Creation

The TSPs will create a web request to call the allocated URI for pushing the tariff data. Using this web request, the TSP will push the XML file as described in Step 1. The method of the web request need to be specified as 'POST', and the content type of the web request will need to be specified as 'text/xml'.

For authentication purpose, each TSP will be provided with a user ID, password and a unique authorization key. These three parameters need to be passed as the web request headers. Failure to authenticate any of these three parameters will result in the rejection of complete XML file. The TSPs will use this web request to pass the XML file as a stream to the web request URI. The API will receive this data stream.

Following are the summary pointsfor the web request to be created by the TSP for quick reference

1. Method : 'POST'
2. ContentType : 'text/xml'
3. Authentication Parameters (User ID, Password, Authorization Key)
4. XML file to be passed as a web stream to the URI using the web request

A typical web request structure would be like the one given below :

WebRequest R1

String URI=<TRAI API URI Path>

String XMLFile=<Path to the XML File generated by the TSP>

R1=WebRequest.Create(URI)

R1.Headers["userid"] = <User ID provided by TRAI>

R1.Headers["password"]=<Password provided by TRAI>

R1.Headers["authkey"]=<Authorization key provided by TRAI>

R1.Method="POST"

R1.ContentType="text/xml"

Step 3: Web Request Authentication

All requests for pushing tariff data from the TSP will be authenticated at the TRAI side. The three authentication parameters of User ID, Password and Authentication-Key which the TSPs will pass in the header of the web request will be gathered and validated.

In case some discrepancy is found in the authentication parameters, the XML data will be out-rightly rejected and the error description for the same will be passed as the response to the web request, so that the corrective action can be taken at the TSP end.

If no discrepancy is found in the authentication parameters, the XML data will undergo the various validation checks before it is accepted into the TRAI database.

Step 4 : Validation Checks

After the request is authenticated at TRAI server, the XML data pushed by the TSP will be subjected to validations. The validation will be a two stage process.

In the first stage of validation checks, each record will be checked for referential integrity, i.e. the standard fields like LSA name, TSP name, Type of Service, Unique Record ID No., Launch / Revision / Correction / Withdrawal, Date of Reporting, Date of Launch etc. will be checked.

The second stage of validation will involve checking tariff validations (e.g. For plans, a maximum of 25 active plans per Circle each for GSM/LTE (Prepaid), CDMA (Prepaid), GSM/LTE (Postpaid), CDMA(Postpaid), Fixed Line Plan(Prepaid), Fixed Line Plan(Postpaid) will be allowed per TSPetc.).

In case a tariff has one or more errors, it will be added to the list of erroneous records. This list will consist of Unique Record ID No. along with the name of field(s) with error and the details of error encountered. A tariff will not be eligible for acceptance into the TRAI database if it has one or more errors. Only those records that are found to be valid for each and every validation checks will be pushed into the TRAI database.

Step 5 : Data Storage

If a tariff record is found to be valid across all validation checks, it will be pushed into the TRAI database, and the status list will be updated accordingly. The status list will be the response that will be sent back to web request raised by the TSPs to push the data. When the iterative process of validating each record and storing the valid records in the database is complete, TSPs will receive the complete status list as the response to the web request.

Step 6 : Response to Web Request

After the data storage process is completed, the system will pass the complete status list as the response to the web request raised by the TSP. This status list will enumerate all the Unique Record ID No's pushed by the TSP, and against each Unique Record ID No., it will be mentioned whether the particular record has been accepted or rejected. In case of rejection, it will also mention the reason(s) for rejection of the record.

The TSP can then make the required amendments to the erroneous records as per the error report. After making the required changes to the tariff record, the TSP can again push the data through the same process of creating a web request. There is no restriction on the number of times a TSP can push the data to the TRAI server.

Format of Unique Record ID No.

The 'Unique Record ID No.' field for each tariff product should be a 12 digit unique alphanumeric ID, which should follow the following format :

1. The first two alphabets should be the TSP code, as per Annexure 3
2. The next two alphabets should be the LSA code, as per Annexure 4
3. The next four alphabets should be the Tariff Product Code, as per Annexure 2
4. The last 4 digits should be numbers.

Important Points for XML Generation :

1. As an exceptional case, if 'Unlimited' needs to be specified for a numeric attribute key value, the word 'Unlimited' can be written for that attribute key value. The required conversion will be done by the software at the time of validating the data.

2. The date type attribute key values should be filled in the format "dd-MMM-yyyy" (e.g. 10th April 2018 should be entered as '10-APR-2018')

3. For attribute keys where data is to be entered as time (e.g. "Time for Call Rates – Peak Time From"), it should be entered as "hh:mm:ss" in 24-hour format (e.g. 6:30 PM should be entered as "18:30:00")

4. Annexure 1 provides the complete information towards the attribute keys for the XML generation at the TSP end. Following are the details about the Annexure 1 columns :
   - Attribute Key – The key name as it is to be entered in the XML file.
   - Attribute Description :Description of the data that each key refers to.
   - Attribute Type : The data type of each key i.e. the kind of data that can be entered for each attribute key.
   - Valid Values : Details about what is to be filled in each attribute key
   - Applicable for : The various tariff product types for which the attribute key is to be filled. E.g. for a 'Combo Pack' type tariff product, the attribute key A8 (category) is not applicable. Hence this attribute key needs to be kept in the XML file without any value.

5. The following regulatory requirements need to be fulfilled by a tariff product before it is considered eligible for storage in TRAI database.

   - All tariff launch or revision needs to be reported within 7 working days – both the days on which the tariff is reported and implemented are to be excluded while calculating 7 working days

   - 'Top-Up' vouchers should be in multiples of Rs. 10 only – can offer only monetary value without any validity or usage restriction

   - STV should not be offered in multiples of Rs. 10 -should contain only tariff benefits & no monetary value - validity should not be more than 90 days, unless it is an STV providing exclusive data benefits.

   - Combo Vouchers should not be offered in multiples of Rs. 10 – it offers monetary value in addition to other benefits

   - Validity of STV/ CV can be maximum for 90days. However, forSTV with "data only" benefits, maximum validity is 365 days.

   - For plans, a maximum of 25 active plansper Circleeach for GSM/LTE (Prepaid), CDMA (Prepaid), GSM/LTE (Postpaid), CDMA(Postpaid), Fixed Line Plan(Prepaid), Fixed Line Plan(Postpaid) will be allowed per TSP. Exceeding this limit while submission will render a record invalid

   - Correction of any tariff product is allowed within 2 days only& reason for correction needs to be compulsory mentioned in remarks column no. A268 as per annexure 1.

- Details mentioned in tariff summary needs to be mentioned somewhere in other data fields also e.g: Remark / Conditions field.

Annexure 1

Attributes for XML file to be generated by the TSPs

Attribute Key	Attribute Description	Attribute Type	Valid Values	Applicable For
A1	Tariff ProductType, as per Annexure 2	Alphanumeric	Name of the Tariff Type. Should be in a pre-defined value format as per column "**Tariff Product Type**" of Annexure 2. This is a compulsory field.	All Tariff Product Types
A2	Tariff Summary	Alphanumeric	- Text detail describing the tariff product - **Details mentioned in tariff summary needs to be mentioned somewhere in other data fields also e.g: Remark / Conditions field** This is a compulsory field.	All Tariff Product Types
A3	Unique Record ID No. of each tariff product.	Alphanumeric	A unique identifier. Refer Annexure 2, 3 & 4 for the standard format. This is a compulsory field.	All Tariff Product Types
A4	Respective TSP Name, as per Annexure 3	Alphanumeric	Name of the TSP. Should be in a pre-defined value format as per column "**TSP Names**" of Annexure 3. This is a compulsory field.	All Tariff Product Types
A5	LSA (Licensed Service Area), as per Annexure 4	Alphanumeric	Licensed Service Area Name Should be in a pre-defined value format as per column "**LSA Names**" of Annexure 4. This is a compulsory	All Tariff Product Types

			field.	
A6	SSA / Cities (In which Services available)	Alphanumeric	Names of Cities where service is available	For ISP only
A7	Type of Service	Alphanumeric	For Fixed Line Plan, Fixed Line WLL Plan& Fixed Line Add On Pack – Any one option from :Landline/ Broadband/Both For Others, any one option from : GSM / CDMA / LTE For plans, a maximum of 25 active plans per Circle each for GSM/LTE (Prepaid), CDMA (Prepaid), GSM/LTE (Postpaid), CDMA(Postpaid), Fixed Line Plan(Prepaid), Fixed Line Plan(Postpaid) will be allowed per TSP. Exceeding this limit while submission will render a record invalid This is a compulsory field.	All Tariff Product Types except ISP
A8	Prepaid / Postpaid	Alphanumeric	any one option from : Prepaid / Postpaid This is a compulsory field.	All Tariff Product Types
A9	Launch / Revision / Correction / Withdrawal	Alphanumeric	Any one option from : Launch / Revision / Correction / Withdrawal For plans, a maximum of 25 active plans per Circle each for GST/LTE (Prepaid), CDMA (Prepaid), GSM/LTE (Postpaid), CDMA(Postpaid), Fixed Line Plan(Prepaid), Fixed Line Plan(Postpaid) will be allowed per TSP - Correction of any tariff product is allowed within 2 days only - If 'Correction', reason for correction needs to be compulsory mentioned in remarks column no. A268 as per annexure 1 This is a compulsory field.	All Tariff Product Types
A10	Revision Unique Record ID No. of	Alphanumeric	A unique identifier	All Tariff

| | | | Refer Annexure 2, 3 & 4 for the standard format.

It should be different from the original tariff product's unique record ID No.

This field is compulsory if it's a 'Revision' Record. | Product Types |
|---|---|---|---|---|
| A11 | Name of the Product | Alphanumeric | The name given to the product by the TSP

This is a compulsory field. | All Tariff Product Types except : Gen ISD Tariff & International Roaming |
| A12 | Unique Plan ID of the Voucher / of the plans for which exclusively applicable | Alphanumeric | If there is a unique Plan ID of the voucher given by the TSP, it needs to be specified here

For plans, a maximum of 25 active plans per Circle each for GST/LTE (Prepaid), CDMA (Prepaid), GSM/LTE (Postpaid), CDMA(Postpaid), Fixed Line Plan(Prepaid), Fixed Line Plan(Postpaid) will be allowed per TSP | Applicable only for Plan Voucher & Postpaid Plan |
| A13 | Date of Reporting | Date | Date on which the tariff product was reported to TRAI. Needs to be a valid date not greater than the current date.

Date needs to be in "dd-MMM-yyyy" format.

This is a compulsory field. | All Tariff Product Types |
| A14 | Date of Launch / Revision / Correction / Withdrawal | Date | Date on which the tariff product was actually launched / revised / corrected / withdrawn by the TSP

Date in this field needs to be less than or equal to A13

Date needs to be in "dd-MMM-yyyy" format.

This is a compulsory field. | All Tariff Product Types |
| A15 | Regular / Promotional | Alphanumeric | This field specifies whether the tariff product is a regular offer or a promotional offer. TSP needs to fill either 'Regular' or | All Tariff Product Types except : Promo Offer |

			'Promotional' in this field. This is a compulsory field.	Gen ISD Tariff International Roaming
A16	Start date of Promotional offer	Alphanumeric	Starting date of the promotional offer. If applicable, Date needs to be in "dd-MMM-yyyy" format. Validity of STV / CV can be maximum for 90days. However, for STV with "data only" benefits, maximum validity is 365 days. This is a compulsory field if A15 is 'Promotional'	All Tariff Product Types except : Gen ISD Tariff & International Roaming
A17	End date of Promotional offer	Alphanumeric	Ending date of the promotional offer. If Applicable, Date needs to be in "dd-MMM-yyyy" format. Validity of STV / CV can be maximum for 90days. However, for STV with "data only" benefits, maximum validity is 365 days. Date in this field needs to be greater than or equal to A16 This is a compulsory field if A15 is 'Promotional'	All Tariff Product Types except : Gen ISD Tariff & International Roaming
A18	special Eligibility Conditions, if any	Alphanumeric	If no eligibility condition applicable, then "NIL" should be entered in this field. This is a compulsory field.	All Tariff Product Types
A19	Price (Including Processing Fee & GST) /	Numeric	A numeric non-negative value denoting the Price (Including Processing Fee & GST). 'Top-Up' vouchers should be in multiples of Rs. 10 only STV & Combo Vouchers should not be in multiples of Rs. 10 This field is compulsory	Prepaid Plan Voucher Prepaid STV Prepaid Combo Prepaid Top Up Prepaid VAS Prepaid Promo Offer

			for Prepaid Plan Voucher, Prepaid STV, Prepaid Combo, Prepaid Top Up, Prepaid VAS, SUK, ISP	SUK ISP
A20	Monetary Value (in Rs.)	Numeric	The monetary value benefit that will be given to the consumer This is a compulsory field.	Prepaid Combo Prepaid Top Up
A21	Available in (Rural / Urban/ Both / Any other)	Alphanumeric	Specify whether the plan is available in Rural / Urban/ Both / Any other	Fixed Line Plan Fixed Line WLL Plan Fixed Line Add On Pack
A22	Registration charges	Numeric	Amount of registration charges, if any	Fixed Line Plan Fixed Line WLL Plan Fixed Line Add On Pack ISP Postpaid Plan
A23	Installation / activation charges	Numeric	Amount of Installation Charges / Activation Charges, if any	Fixed Line Plan Fixed Line WLL Plan Fixed Line Add On Pack ISP Postpaid Plan
A24	One time Security Deposit	Numeric	Amount of ISP Deposit, if any	ISP
A25	Normal Modem Charges	Numeric	Normal Modem charges, if any	ISP Fixed Line Plan
A26	WiFi Modem Charges	Numeric	Wifi Modem Charges, if any	ISP Fixed Line Plan
A27	Plan enrolment fee, if any	Numeric	Enrolment fee for the plan, if any	Fixed Line Plan Fixed Line WLL Plan Fixed Line Add On Pack

				ISP
				Postpaid Plan
A28	Other one time charges (Please specify)	Numeric	Any other charges	Fixed Line Plan
				Fixed Line WLL Plan
				Fixed Line Add On Pack
				ISP
				Postpaid Plan
A29	Rental / Minimum billing amount, if any- Fixed Charges	Numeric	Rental or minimum billing amount, if any. This field is compulsory for ISP, Postpaid Plan, Postpaid Add On Pack, Fixed Line Plan, Fixed Line WLL Plan, Fixed Line Add On Pack	ISP
				Postpaid Plan
				Postpaid Add On Pack
				Postpaid
				Promo Offer
				Fixed Line Plan
				Fixed Line WLL Plan
				Fixed Line Add On Pack
A30	Advance rental option for longer periods	Numeric	Advance rental amount, if any	ISP
				Postpaid Plan
				Fixed Line Plan
				Fixed Line WLL Plan
				Fixed Line Add On Pack
A31	Security Deposit - Local	Numeric	Amount of Security Deposit - Local	Postpaid Plan
				Fixed Line Plan
				Fixed Line WLL Plan
				Fixed Line Add On Pack
A32	Security Deposit – Local + STD	Numeric	Amount of Security Deposit – Local + STD	Postpaid Plan
				Fixed Line Plan
				Fixed Line WLL Plan

				Fixed Line Add On Pack
A33	Security Deposit – Local + STD + ISD	Numeric	Amount of Security Deposit – Local + STD + ISD	Postpaid Plan Fixed Line Plan Fixed Line WLL Plan Fixed Line Add On Pack
A34	Security Deposit – National Roaming	Numeric	Amount of Security Deposit – National Roaming	Postpaid Plan
A35	Security Deposit – International Roaming	Numeric	Amount of Security Deposit – International Roaming	Postpaid Plan
A36	Security Deposit – Any Other	Numeric	Amount of Security Deposit – Any other	Postpaid Plan Fixed Line Plan Fixed Line WLL Plan Fixed Line Add On Pack
A37	Fixed Charges –Exchange Capacity<=999	Numeric	If Exchange capacity wise FMC (Charges for exchange capacity <=999)	Fixed Line Plan Fixed Line WLL Plan Fixed Line Add On Pack
A38	Fixed Charges –Exchange Capacity > 999 and <=29999	Numeric	If Exchange capacity wise FMC(Charges for exchange capacity> 999 and <=29999)	Fixed Line Plan Fixed Line WLL Plan Fixed Line Add On Pack
A39	Fixed Charges –Exchange Capacity >= 30000 and <=99999	Numeric	If Exchange capacity wise FMC(Charges for exchange capacity >= 30000 and <=99999)	Fixed Line Plan Fixed Line WLL Plan Fixed Line Add On Pack
A40	Fixed Charges –Exchange Capacity >= 100000	Numeric	If Exchange capacity wise FMC(Charges for exchange capacity >= 100000)	Fixed Line Plan Fixed Line WLL Plan Fixed Line Add On Pack

A41	Optional Fixed Monthly Charges - CLIP	Numeric	CLIP Charges	Fixed Line Plan Fixed Line WLL Plan Fixed Line Add On Pack
A42	Free Calls – MCUS per month	Numeric	Free calls in MCUS per month	Fixed Line Plan Fixed Line WLL Plan Fixed Line Add On Pack
A43	Free Calls – MCUS per month – Exchange capacity<=999	Numeric	Free calls in MCUS per month for exchange capacity <=999	Fixed Line Plan Fixed Line WLL Plan Fixed Line Add On Pack
