Sub: Eliminate IUC Tariff

Dear Sir/ Madam,

The current changes in the broadcasting tariffs (DTH) by TRAI is aching us and we are being made to pay higher fees for lesser number of channels which is favoring the TV channels and broadcasters.

Now, it is seen that TRAI is also reviewing the IUC charges which it had earlier decided to remove from 1<sup>st</sup> Jan 2020. This would result in increase in charges by operators which will impact the customers further.

As a controller, you need to defend the interest of the consumers. TRAI needs to safeguard that cost for customers does not increase for the sake of profits for telecom operators. We as consumers cannot continue to pay higher tariffs on mobile phones as we are being made to do with DTH connections.

I appeal you to please continue with your earlier order on elimination of IUC charges and not load us further with higher tariff.

*Prasanta Mohanty*

Thanking You,
