Subject: Minimum speed for CDMA EVDO.

Hi sir,

I am resident of Nagpur (Maharashtra).

I want to tell you that the minimum speed for cdma evdo will be of 1Mbps.

And internet packs of cdma have increased dramatically .so I want to request you give us old cdma internet plans

I am on TATA CDMA .

I want also tell you that tata cdma copmany are not giving necessary services like MNP to their CDMA .

They are pushing all cdma customers to their own GSM network .

Plz do something in this regards.

Thanking you

User of indian telecom industry
