Respected sir/Madam,

TRAI Wireless policy indicates 3G speed must be minimum 1mbps, but I faced till now the low speed in good 3G signal strength like (-60 dBm 35 asu) the data transmission speed will be 90 kbps to 550 kbps in most popular Network providers like AIRCEL, AIRTEL, TATA DOCOMO, IDEA.

In BSNL only I can use 200 kbps to 800 kbps

But all of these network providers are advertised their data packs had upto 3.1mbps but till now any one couldn't give that to us

In 2G  
I never faced above 30 kbps in all networks

So in future they must will give the minimum quantity of data or must reduce their service cost

I request to TRAI it must be regulate this service

--  
Dear Sir / Madam,

Forwarded herewith for appropriate action with a request to intimate the action taken to the complainant. Action taken may kindly be reflected in the MIS Sheet on weekly basis.

Yours sincerely,

[G.P. Vishnoi]  
Sr. Research Officer [CA ]
