Subject : Mobile validity period change

To : Mr Kaushal Kishore <advfea1@traf.gov.in>

Respected sir/madam,

It has been heard that TRAI has sought suggestions from consumers to increase the mobile recharge validity from 28,56,84 days to 30,60,90 days.

In this case, as a consumer, I suggest that doing so is a very good and appropriate decision. This will provide direct benefit to the consumers and will have to reduce one recharge throughout the year.

Therefore, my humble request is that keeping in mind the interests of consumers, the decision to increase this validity is right and should be implemented at the earliest.
