New Delhi-110002.

**Sub: Interconnection Usage Charges removal**

Dear sir,

The Interconnect Usage charges is associated with old telecom technology. It has been outpaced by the rapid technological advancement and evolution in Telecom Sector.

Since IP based networks are poised to be the network of the future for providing telecome service like 4G/5G, and BAK was designed to be the natural facilitator in this Journey.

Sufficient time was given to telecos for adopting new technology to bring no charges for carrying & termination of call, But they have failed and resulting continued burden of extra charges on consumer.

Kindly do not further extend the time limit for removal of IUC regime.

Your sincerely,

For Public Relation Society, Bhopal

*Manoj Dwivedi*
