Dear Sir,

I appreciate TRAI's view on controlling price for broadband connection for PDO upto max 2x than retail broadband connection by ISP/TSP, to promote PM-WANI at mass level. We as a PDOA always appreciate any action taken in favour of PDO and PDOA for better promotion of PM-WANI Scheme. We would like to point out few more points in favour of PM-WANI scheme as below:

1. Finance/funding options by banks for PDO would promote them to install more device for better coverage as previous amendment indicates to install upto 100 devices for single PDO.
2. More Hardware options - Guidelines would make clear parameters, so more manufacturers could provide Access Points.
3. Promote Open Source of Stack by CDOT.

We would again appreciate everything which will promote PM-WANI in feasible and better way.

Thank you.

with regards,

GAJENDRA SINGH
