Number of Internet subscribers accessing internet through Wireless < 2 Mbps download Speed

* Radio includes subscription using Unlicensed Band Radio (UBR)- Point to Point, Point to Multipoint.

Note:

1. Provide service area wise information as defined in the UL/UL(VNO)/ISP license.

2. Wireless Subscribers accessing internet at least once in a calendar month should be reported as a subscriber for the month.

3. If a subscriber accesses more than one technology in a calendar month, the subscriber should be reported under the suitable column of technology which offer highest download speed, amongst the various technologies used by the subscriber for accessing internet during that

4. While reporting number of hotspots, one hotspot should be reported as one subscriber/connection instead of reporting the users accessing that Hotspot.

*FTTx: Refers to Fiber to the home/ building (FTTH/ FTTB)

Internet Lease Line: Pls fill Data Usage details of Enterprise Customers

$ Ethernet/Lan data usage: Refers to data usage on the subscription using IEEE 802.3 technology, wherein **internet access is provided over wireline networks** such as copper wire, coaxial cable, optical fiber cable, from telephone exchange/ node (switch) to aggregation switch. The subscribers are served using ethernet cables (CAT5, CAT6) - terminating directly on this aggregation switch. *The data usage on subscriptions of FTTx, DSL, Cable modem, ILL, Wi-Max, Wi-Fi, fixed Satellite terminals, and those with internet access via mobile cellular networks are excluded*
