Subject: Comment on Public Wi-Fi Networks
==== Forwarded message =====

Sir,

I am a student who came across the Consultation paper on public Wi-fi. This mail is to let you know my comments. Public wifi system will be helpful for middle class students like me who are unable to access Other network sources. Internet is mandatory for studies and thats why wifi connection in Central University is helpful.Rural areas lack fast network connection and it affects our studies as well. Charging a less amount would be acceptable and it will be a great innovation.Thank you

With regards,
Manila G
