**Subject:** **Sub: Tariff related issues for Broadcasting and Cable services**

Dear Sir,

With reference to traif's consultation paper on tariff,  
i would like to express my opinion as a subscriber.

I feel the concept of different tariffs for a channel having two streams  
SD and HD., should be abolished.I mean, if a subscriber opts for a  
channel he should get both the streams for one charge.

Present Tariff Scenario :

SD Stream + HD Stream costs a max of  $17 + 19 = \text{Rs.}36$ .

**My request: I should get For Rs. 19 or lesser Both SD and HD Streams.  
If I opt for SD, I should get HD free of charge, and vice versa.**

If this concept is implemented by TRAI, it gives a lot relief to subscribers a lot,  
and eliminates confusion which stream or Packages to opt for.

With Regards,  
B Nagireddy.  
(subscriber for Cable Digital CAS for about 11 years)
