Dear Sir

Please find some thoughts for formulating National Telecom Policy 2018:

PI consider

1. Provisions for Building Network Readiness Index (& Technology Readiness Level) at District Level while drafting National Telecom Policy 2018 to address Industry 4.0 (e.g. IoT)
2. Pointers for India about Network Readiness Index in 2016 by World Economic Forum
3. National Telecom Policy 2018 should support Digital Aadhaar & Information Technology requirements of Nation
4. National Telecom Policy 2018 should consider UIDAI requirements like connectivity, internet, processing, integration, scalability, security, big-data & analytics etc.

Will be grateful for your feedback.

Thanks and Regards

Vivek Barve, Ph.D
